	Page
Table 1.- Domestic exports by countries of destination: <u>Value</u> of agricultural products, with comparisons, 1960	3-5
Table 2.- Imports (for consumption) by countries of origin: <u>Value</u> of agricultural products, with comparisons, 1960	6-8
Table 3.- Domestic exports: <u>Quantity</u> and <u>value</u> of principal agricultural products, by countries of destination, 1960	9-25
Table 4.- Domestic exports: <u>Quantity</u> and <u>value</u> by specified countries of their principal agricultural products, 1960	26-39
Table 5.- Imports (for consumption): <u>Quantity</u> and <u>value</u> of principal agricultural products, by countries of origin, 1960	40-52
Table 6.- Imports (for consumption): <u>Quantity</u> and <u>value</u> by specified countries of their principal agricultural products, 1960	53-63

General Note

Except as otherwise noted, all trade figures in this publication are compiled from publications and official records, Bureau of the Census.

The term "foreign trade" applies to trade between the United States, including its territories, and foreign countries. Trade between continental United States and its territories is referred to as "shipments". Figures for shipments out of the territories include small quantities to other territories. In statistics of foreign trade, forest products and distilled liquors are considered nonagricultural products.

Exports under various special economic-aid programs are included in figures appearing in this publication, but separate figures are not being compiled by the Bureau of the Census on exports under these programs. Excluded from the export figures are shipments to the United States armed forces abroad for their own use, shipments between continental United States and the territories and possessions, and shipments between the territories and possessions. Excluded from the dollar value is any export subsidy paid to private United States exporters on shipments of domestically produced agricultural commodities.

In the classification of agricultural imports into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others.

Special Note

Since July 1953, the Bureau of the Census has been estimating some exports and imports on the basis of a special sampling technique. The procedure is explained in Foreign Trade Statistics Notes for September 1953, February 1954, September 1957, January-March 1958, and October-December 1959. Copies of these publications are obtainable from the Bureau of the Census, Washington 25, D. C.

A textual analysis of the export statistics in this publication appears in Foreign Agriculture ERS-FOREIGN-15 issued August 1961. The publication is available free on request to Economic Research Service, U. S. Department of Agriculture, Washington 25, D. C.
